

SEVERING UPROOT OR WINDBLOWN TREES [302] FORMERLY CS33

PRE-REQUISITES

201 (CS30.1); 202 (CS30.2); 203 (CS31);
301 (CS32)

DURATION

2 days training plus independent
assessment

QUALIFICATION

City & Guilds NPTC (L3) Award in
Severing Uprrooted or Windblown
Trees using a Chainsaw (21-02)

COST

£320 +VAT

THE COURSE COVERS

The trees will be both over and under guide-bar length in diameter, dealing with trees both fully and partially uprooted.

This also includes the severing of root-plates that overhang the chainsaw operator's cutting position using mechanical or other appropriate machinery for restraint as well as the severing of partly blown (leaning) trees and the felling of wind-snapped (broken) trees with and without the tops attached.

Winches or other appropriate machinery may also be used for restraint of trees with side tension or where the stem is likely to roll.

Also:

- Site safety and personal protective equipment (PPE)
- Regulations and safety requirements
- Assessing lying, windblown and broken timber and deciding on appropriate action
- Cutting windblown trees using appropriate techniques
- Operating a winch to control movement of root plates
